Summer Undergraduate Research Opportunity

HP 4950 – *Research Apprenticeship in Health Professions*

- Opportunity to work with a faculty member on a research project over the summer for course credit
- Seeking SHP undergraduate students with 3.5 GPA or higher with an interest in exploring research

**Benefits**

- Gain research skills through mentorship by SHP faculty
- Attend seminars and share your research projects with other students
- May present findings of your research at university, regional, or national events
- Build research skills and enhance your resume for graduate school

**Process**

- Go to the HP 4950 web page (insert web address here) and identify an SHP faculty member with whom you would like to work
- Follow the instructions on the web page for contacting the faculty member and inquiring about the course
- Faculty may require an application or interview as part of the selection process
- It is recommended that students contact faculty about pursuing this opportunity for Summer/Fall by March 21, 2014.
