

# Worksheet for planning the next study on the use of touch pressure and proprioception in everyday settings to support participation

Planning team: \_\_\_\_\_

METHODS	What will you do?	What is your rationale based on the literature?
Participants [who exactly will be in your study]		
Setting [where exactly will you conduct your study]		
Target Behavior [what exactly do you want to measure/ change]		
Intervention [what exactly will you use to make the change you want]		
Experimental design to show effectiveness [how will you convince others that they can count on your findings]		
Procedures [what exactly will you do to complete the study systematically]
