Introduction to Vestibular Rehab:  
BPPV & Concussion

Presented by: Carmen Abbott  PhD, PT  
Shari Kicker, MPT  
Dawn Belmore, MEd, LAT, ATC

Hosted by: Physical Therapy  
School of Health Professions  
University of Missouri Health

Date: April 7-8, 2018  
Location: University of Missouri  
616 Clark Hall, Columbia, MO  
Intended Audience: PT, PTA, and Athletic Trainers  
Contact hours: 16

OBJECTIVES

At the end of this course, participants will be able to:

- Conduct and interpret an examination of the patient with “dizziness” including patient history and subjective exam; oculomotor exam, balance and gait assessment.
- Perform treatment for Benign Paroxysmal Positional Vertigo based on Positional Testing examination.
- Discuss vestibular structure as it relates to vestibular function.
- Discuss differential diagnosis using bedside examination of patients who present with Acute Vestibular Syndrome.
- Discuss pathophysiology of central vestibular disorders with emphasis on concussive disorders.
- Discuss the 11 R’s of SRC management to provide a logical flow of clinical concussion management.
- Describe presentation of concussive clinical subtypes and management strategies.
- Discuss individualized stepwise supervised concussion rehabilitation program.
- Understand current topics and identify resources that guide clinical practice in the management of sport related concussion (SRC).
- Explain and demonstrate effective implementation of graduated return to play following SRC.
