University of Missouri Radiography Program
Program Effectiveness Data

Accreditation Information:
Institution:
The University of Missouri is regionally accredited through the Higher Learning Commission, a Commission of the North Central Association of Colleges and Schools. (University of Missouri URL: http://provost.missouri.edu/accreditation/nca.html)

Program:
The University of Missouri Radiography Program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT). The program has a full 8-year accreditation with the next review date in September of 2016. Program effectiveness data is available on the JRCERT and University of Missouri Radiography Program websites. JRCERT contact information:

Address: JRCERT
20 N. Wacker Drive, Ste 2850
Chicago, IL  60606-3182
Phone: 312-704-5300
Fax: 312-704-5304

E-mail: mail@jrcert.org

Credentialing Pass Rate
Credentialing examination pass rate is defined as the number of student graduates who pass, on first attempt, the American Registry of Radiologic Technologists (ARRT) certification examination or an unrestricted state licensing examination compared with the number of graduates who take the examination within six months of graduation. JRCERT Standard 5.2 states that programs must document a five-year average at first attempt credentialing examination pass rate of not less than 75 percent first attempt within six months of graduation.

Job Placement Data
Job placement rate is defined by the JRCERT as the number of graduates employed in the discipline (i.e., radiologic sciences, radiation therapy, magnetic resonance, or medical dosimetry) compared to the number of graduates actively seeking employment in the discipline. The JRCERT has defined not actively seeking employment as: 1) graduate fails to communicate with program officials regarding employment status after multiple attempts, 2) graduate is unwilling to seek employment that requires relocation, 3) graduate is unwilling to accept employment due to salary or hours, 4) graduate is on active military duty, and/or 5) graduate is continuing education. JRCERT Standard 5.2 states that programs must document a five-year average job placement rate of not less than 75 percent within twelve months of graduation.

Program Completion Rate
Program completion rate is defined as the number of students who complete the professional phase of the program within 150% of the state program length. The professional phase of the program is 24 months following acceptance into the program.

University of Missouri Radiography Program
Program Effectiveness Data

Program Mission Statement
The primary mission of the radiography program is to prepare highly competent, registry eligible professionals in the medical imaging sciences. Our program and curriculum are designed to provide an educational foundation for the advancement into leadership and managerial positions within medical imaging, as well as providing an environment where scholarly activity, professional development, and service are expectations. Our curriculum enables successful graduates to readily interact with a variety of health care and science related fields.

Program Goals/Objectives

In order to fulfill the primary mission of this program, the following goals and objectives have been developed:

1. Recruit students with a demonstrated track of educational excellence into our full-time professional program

2. Continually improve the educational program to ensure that students receive relevant and timely instruction as it pertains to the medical imaging discipline

3. Maintain accreditation with national organizations to ensure that our program continues to meet the high standards set forth by these organizations

4. Promote continuing education of medical imaging professionals with specific emphasis on providing this education to rural health care practitioners

5. Stimulate critical-thinking and problem-solving abilities through curriculum design

6. Ensure that students are well prepared to pass national certifying examinations

7. Focus on accepted radiographic positions, while allowing students the opportunity to be creative and innovative in accomplishing this task

8. Adequately prepare students to enter into the job market competitively upon graduation

9. Provide students with opportunities for interaction with other health care professionals to develop a multidisciplinary approach to health care delivery

10. Encourage medical imaging professionals to consistently employ radiation safety to protect those who come to us for medical care

11. Promote professional and ethical behavior, thus positively influencing public perception of the medical imaging profession
Goal: Students will be clinically competent
Student learning outcomes:
- Students will provide appropriate patient care
- Students will demonstrate good patient positioning
- Students will select appropriate technical factors
- Students will demonstrate proper use of radiation safety.

Goal: Students will communicate effectively
Student learning outcomes:
- Students will demonstrate effective written communication skills
- Students will demonstrate effective oral communication skills

Goal: Students will use critical thinking and problem solving skills
Student learning outcomes:
- Students will be able to modify standard imaging protocols to non-routine procedures.
- Students will demonstrate an appropriate approach to solving problems

Goal: Students will evaluate the importance of professional growth and development
Student learning outcomes:
- Students will demonstrate professional integrity
- Students will evaluate the value of professional organization membership

Goal: The program will graduate entry level technologists
Student learning outcomes:
- Students will pass the ARRT national certification on first attempt
- Students pursuing employment will be gainfully employed within 12 months of graduation
- Students will complete the program
- Students will be satisfied with their education
- Employers will be satisfied with the graduates’ performance
In order to achieve our mission, objectives, and goals the program and its personnel will strive to:

- Continually assess the needs of students and employers in the field of medical imaging,
- Maintain and enhance affiliations with regional health care institutions and professional organizations,
- Appoint and retain highly qualified didactic faculty,
- Regularly and consistently evaluate the competence of students in the areas of technical expertise and professional development,
- Maintain an educational environment that encourages personal growth, recognizes academic successes, and provides adequate support mechanisms to further foster student success,
- Develop and disseminate continuing education materials to address the needs of rural health care practitioners, and
- Conduct appropriate research to contribute to the medical imaging profession.
