

Children Needed for Research Study

Researchers at the University of Missouri-Columbia are looking for 9 - 12 year old children to participate in a study of children's word learning. To participate, children must either (a) have typical language skills or (b) have a language weakness/impairment. Children will receive language tests, complete a hearing screening, read stories, and answer questions.

The study requires 3 sessions ranging from 15 to 90 minutes.

Participants will be compensated for their time.

Sessions take place on the MU campus and will be scheduled at parents' convenience.

To help us learn more about word learning,
please contact Dr. Stacy Wagovich in the Language and Fluency Lab by
